Quantity, Timing and Intensity

Before choosing a package of aerial fireworks it is important that you know that the amount of effects distributed in certain time determines the intensity of the display.

The shorter the time, the greater the intensity because the effects are detonated faster one from another.

Augmented reality photo booth: the next big thing in photo novelty

A special occasion deserves a special event experience with a state of art technology: your wedding, anniversary, birthdays, just for fun, etc.
The sky and your creativity will be the limit.

Video link: https://youtu.be/rUM_uN-oyNs

The guest stands in front of the open air photo booth and then view themselves appears on a large monitor. Instantly, random 3D props are loaded onto the screen and the guest is able to move and interact with them as if they are real! The guest is able to switch the random props by raising their right hand above their head and open it. Like magic hand gestures will make the booth operate without touching anything!

Once the guests are ready to take their photo, they pull down the virtual gesture slider and 3..2..1.. snap!
A memorable augmented reality photo is printed and handed to the guests.

We are also utilizing a new technology that allows us to remove the backdrop without the need of a green screen backdrop. Guests can find themselves anywhere in the world or space with virtual props on them! Using cool photo backdrops or even video.

You will receive the value service of 3 devices for just one price:
Augmented reality video and photography with gesture sensors,
digital photo booth, and green screen background.
